

Assistive Technology for Learning Disabilities

3.5 CRCs available

Date: May 2, 2023

Time: 8:30 AM – NOON

SEATAC DVR Office

18000 International Blvd Suite 1000, Conference Room, SeaTac, WA 98188-4204

In this course, the instructors will provide an overview of the challenges faced by individuals with Learning Disabilities and employment, identify different types of Assistive Technologies and their relevant features, and walk participants through the decision-making process to help guide councilors in making the right decisions when matching features to function. This will be an interactive course with didactic instruction, some hands-on with Assistive Technology, and Q&A.

Objectives

1. Understand barriers to employment caused by learning disabilities and identify 3 assistive technology solutions to help compensate for those barriers.
2. Be able to identify different hardware solutions and how to implement them.
3. Be able to identify in what situation individuals should use dedicated literacy software vs. mobile apps to support reading and writing to achieve functional outcomes.
