

## Off the Shelf Low-Cost Assistive Technology Solutions and Modifications

3.5 CRCs available

Date: May 2, 2023

Time: 1:15 PM – 4:45 PM

SEATAC DVR Office

18000 International Blvd Suite 1000, Conference Room, SeaTac, WA 98188-4204

Low Tech AT solutions class will focus on identifying clients' individual work needs, integrating personally developed accommodations, and incorporating off-the-shelf, low-tech solutions to move job seekers forward. This hands-on training will explore everyday tools and materials that can be used in fabricating assistive technology solutions in 5 minutes or less. Each attendee will use an assortment of everyday tools and materials found in their home, local hardware store, or other local resources.

### Objectives

1. Identify 3 local resources to obtain low-cost job modification materials
2. Identify 3 low-cost solutions for stabilizing or positioning AT Devices
3. Identify 3 locally available materials used in low-tech employment solutions
