

Vector VPAT Remediations for Diversity, Inclusion and Belonging for Students

Description:

This VPAT Remediations report is an Addendum to the VPAT/Accessibility Conformance Report delivered to Vector Solutions by TestPros, Inc. on September 26, 2023. The updated table in this document is intended to show software development enhancements, progress made, and timelines for resolution of items identified by TestPros as needing remediation for conformance.

The VPAT for the LMS was reviewed for conformance at the WCAG 2.0 AA level but also includes WCAG 2.1 AA remediation needs. The table in this document includes all remediation needs cited in the VPAT, including a summary, location in the product where an issue was identified, description, the criteria for either WCAG 2.0 AA or WCAG 2.1 AA, and the remediation status.

For additional information, contact John Barans at john.barans@vectorsolutions.com.

Vector LMS VPAT Remediations:

#	Summary	Location	Description	WCAG 2.0	WCAG2.1	Remediation Status
1	Ensure active user interface components have sufficient contrast	Pre-Assessment	The radio buttons do not have complaint contrast ratio of 3:1 against the background color when they are not selected.		1.4.11	Being evaluated for 2024
2	Avoid using implicit headings	Introduction	Ensure all the visual headers are marked up as programmatic headings	1.3.1		Being evaluated for 2024
3	Provide a valid label for the form field		The edit box does not have a valid label. Please use aria-label to provide an appropriate label.	4.1.2		Being evaluated for 2024
4	Ensure focus order is logical		When user presses next on the Team effort screen, and Key points screen opens focus does not move to the new content. It stays on the next button at the bottom.	2.4.3		Being evaluated for 2024
5	Ensure color is not used as a sole way to communicate selection	Your identities	Selected tab is identified using color only	1.4.1		Resolved

6	Ensure all the instructions are associated with the Controls	Your Community	All the instructions that are essential for the form fields need to be associated with the form fields using role="group" and aria-labeledby attribute can fix this	3.3.2		Being evaluated for 2024
7	Link that is opening in a new tab needs to have additional info			2.4.4		Being evaluated for 2024
8	Ensure sensory character is not the sole way to communicate information		Asterisk is used to indicate the required form field without textual info	1.3.3		Being evaluated for 2024
9	Error message is not communicated with the screen reader			4.1.2		Being evaluated for 2024
10	Error message is very generic and does not include the field of error			3.3.1		Being evaluated for 2024
11	Color contrast issue			1.4.3		Being evaluated for 2024
12	Non text contrast issue				1.4.11	Being evaluated for 2024
